

MOHAMMAD RAIHAN HADRIANSYAH PRASETYA

AI/ML ENGINEER | FULL-STACK DEVELOPER

Bandung, Indonesia | +62 818-0230-1888 | reyyhadri@gmail.com | linkedin.com/in/reyyhadri | github.com/RaihanHadriansyah21 | portoreyy.vercel.app

PROFESSIONAL SUMMARY

Telecommunication Engineering graduate (S.T.) from Telkom University with yudisium completed and formal degree conferral in November 2026, focused on applied AI/ML and full-stack product engineering. Builds end-to-end systems that connect machine-learning models and FastAPI inference services with web/mobile interfaces, databases, asynchronous queues, testing, and deployment. Hands-on experience with Python, TensorFlow, FastAPI, Next.js, TypeScript, Supabase, Redis/RQ, Flutter, and Docker.

EDUCATION

Telkom University - Bandung, Indonesia

2022 - 2026

Bachelor of Engineering (S.T.) in Telecommunication Engineering | GPA: 3.29/4.00

Officially graduated (Yudisium completed); formal commencement ceremony scheduled for November 2026.

SELECTED PROJECTS

SCOVIS - Applied AI and Full-Stack Scoring Decision Support

2025 - 2026

Team project | Next.js, TypeScript, Supabase, FastAPI, Redis/RQ, TensorFlow, Docker

- Contributed to a three-role workflow that classifies handwritten-answer images directly and routes recommendations through asynchronous API, queue, worker, database, and lecturer-review stages.
- Worked across integration surfaces connecting model inference with upload, status tracking, human review, score override, and result-release workflows for 24 answer sections.

DermaScan - Educational Skin-Lesion Decision-Support Prototype

2026

Team capstone | TensorFlow Lite, FastAPI, React, Railway, Vercel

- Converted the model artifact to TensorFlow Lite, integrated FastAPI inference with the React interface, and supported full-stack deployment for binary-risk and five-class lesion outputs.

Vehicle Image Classification with MobileNetV2

2025

Machine-learning project | TensorFlow, transfer learning, model export

- Built a four-class vehicle classifier using a frozen ImageNet MobileNetV2 backbone and an 80/10/10 stratified split; recorded 93.46% held-out test accuracy and exported SavedModel, TFLite, and TensorFlow.js formats.

PROFESSIONAL EXPERIENCE

CV. Bima Technologies - Jember, East Java, Indonesia

Jun 2025 - Sep 2025

Information Technology Intern

- Supported full-stack website development across frontend and backend tasks, requirements analysis, technical documentation, and Excel-based data handling for ongoing client projects.
- Contributed to cross-division technical operations, including a CCTV monitoring-room relocation, application and website discussions, and exposure to server and data-center workflows.

PT Telkom Indonesia (IndiHome) - Bandung, Indonesia

Jul 2021 - Aug 2021

Telecommunication Installation Intern

- Assisted field technicians with residential Wi-Fi installation, cable management, ONT/router configuration, troubleshooting, and customer communication.
- Gained hands-on exposure to last-mile network deployment and Fiber to the Home (FTTH) installation processes.

LEADERSHIP EXPERIENCE

Telecommunication Engineering Student Association (HMTT) - Telkom University

2023 - 2026

Head of Commission 3, Student Representative Council (2025-2026) | Legislative Staff (2024-2025) | Intern Staff (2023)

- Led Commission 3 in supervising and evaluating executive-board programs, coordinating hearings and internal meetings, reviewing reports and regulations, and delegating work to commission members.
- Previously monitored program implementation, facilitated student feedback, and contributed to organizational accountability and policy oversight.

CERTIFICATIONS AND TRAINING

-
- Coding Camp 2026 - AI Engineer specialization, DBS Foundation and Dicoding Indonesia (program completion, Jul 2026).
 - Membangun Proyek Deep Learning Tingkat Mahir, Dicoding (90 hours; custom TensorFlow training and multivariate time-series submission, May 2026).
 - Belajar Fundamental Deep Learning, Dicoding (110 hours; computer vision, NLP, time series, recommendation, and deployment, May 2026).
 - Belajar Machine Learning untuk Pemula, Dicoding (90 hours; supervised and unsupervised project submission, Apr 2026).

TECHNICAL SKILLS

Programming: Python, TypeScript, JavaScript, Dart, SQL

AI/ML: TensorFlow, Keras, transfer learning, computer vision, NLP, time-series forecasting, model conversion and export

Backend and Data: FastAPI, REST APIs, Supabase Auth/PostgreSQL/Storage, Redis, RQ

Frontend and Mobile: Next.js, React, TypeScript, Flutter, Provider

Deployment and Tools: Docker, Docker Compose, Caddy, Vercel, Railway, Git, GitHub, CI

SOFT SKILLS

Problem Solving, Analytical Thinking, Collaboration, Communication, Adaptability, Leadership, Independent Learning

LANGUAGES

Indonesian: Native

English: EPrT 490 (CEFR B1, valid until Apr 2028); English for Business Communication score: 90%
